KERMADEC

Some of the mail I receive is interesting.. From two sources I obtained the same info about who will go to Kermadec this year.

We know who or at least where the operators will come from but about 7 weeks ago Jim Smith rec'd a letter from the ZL govt. Keep in mind that Jim already has the permission to go. It is understood his permission to go now has been denied! Being a true DXer he would like to know why. This was cause for a telephone call to the proper authority in New Zealand. They informed Jim that knowing the DXpedition would be widely publicized, it would be in their best interest if New Zealand nationals went to the island.

We know now that when they are on the air, we can work Jim or the ZLs.. The true spirit of DXing came thru or was it a very loud insistent voice. I have heard both are the same....

Ever have problems remembering little things in life. Clip and enclose in plastic.

BOUVET

At present there are two groups trying to obtain permission. A W/SM and the LADK. The target date for LADA is late 84. Their transportation had too many restrictions for a good operation so they dropped it and trying again. No one has the paper in hand yet.

More on this and Peter I is. later..

===== VU7WCY/JB and crew are making an effort to work into all areas that has been tain so far. One thing for sure, you can hear this group. =====

BHUTAN

LADKX now has a contact in the UN who has a contact in a small adjoining country. An effort is being made thru the proper (legal) channels to reactivate A51PN.. Better equipment hopefully can go this route also. =====

FCC RULES

A contact now has a means of knowing within 2 to 3 days when any proposal or change has been issued. CDXA will be informed
